

March 1, 2012

Attn: Black Hawk Energy Products

On September 30, 2011, we had two Powerhouse power conditioning systems installed by Black Hawk Energy Products. One of them was installed on a 400-amp panel and one on an 800-amp panel.

We are very pleased with the energy savings and increased equipment efficiency. With the energy savings and the mild winter weather, the units have nearly paid for themselves.

We have attached a spreadsheet of New Hope's 2010-2011 Electric Bill to show the savings.

Sincerely,

Tom Malone, pastor

Jeff Chandler, deacon board chairman

Brent Stidham, trustee board chairman
